

Atmakuri Yeshwanth

Computer Science Undergraduate — Specialization in AI & ML

☎ +91 63708 46448 | ✉ atmakuriyeshwanth@gmail.com | 📷 [yesh26](#) | 🐙 [YEsh-DEV](#)

Passionate Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience building RAG-based voice agents and real-world applications. Currently expanding knowledge in Deep Learning and Agentic AI.

Projects

Nexi – RAG-based Voice Agent | *Python, Lang Chain, Live-Kit, Qdrant*

- Nexi a voice driven AI assistant to help university students get quick and accurate answers to their queries about their campus life, Retrieval-Augmented Generation pipeline to provide information from base university documents.
- Used a dual RAG (Retrieval-Augmented Generation) system with a smart query router that automatically selects the correct data source—either university documents (PDFs) or structured data (JSON)—to ensure contextual accuracy.
- Designed persistent sessions enabling conversation memory, reconnection continuity, and seamless STT-TTS integration. . [\(Github\)](#)

Weather Podcast | *HTML, CSS, JavaScript*

- A responsive weather application that provides real-time weather information for any city worldwide. Built with HTML, CSS, and JavaScript, this app features a modern glass-morphism design and smooth animations [\(Github\)](#)
- **Tech:** HTML, CSS, JavaScript, OpenWeatherMap API.

Hunger – Modern Food Platform | *HTML, CSS*

- Developed and deployed a fully responsive food ordering web application [\(Github\)](#)

NACC – Tournament Predictions | *Python, scikit-learn, XGBoost*

- Built and evaluated a machine learning model to predict NCAA basketball tournament outcomes using XGBoost within a scikit-learn pipeline for robust modeling and applied Stratified K-Fold cross-validation for rigorous evaluation [\(NACC-predictions\)](#)

Customer Churn Prediction | *Python, scikit-learn, XGBoost, Random Forest*

- Developed a customer churn classification model on a telecommunications dataset.
- Improved prediction performance from 62 % (baseline) to 80% accuracy through hyperparameter tuning and cross-validation; generated insights on customer retention risk factors [\(Customer-churn predictions\)](#)

Technical Skills

Programming Languages :	Python, C++
AI / LLM Frameworks :	LangChain, LangGraph, Hugging Face, RAG Pipelines, CrewAI, LangSmith
Machine Learning :	Linear & Logistic Regression, Decision Trees, Random Forests, XGBoost, SVM, ANN
Data Processing :	Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)
Model Evaluation :	Accuracy, Precision, Recall, F1-Score, ROC-AUC, Confusion Matrix, RMSE
Databases / Vector Stores :	Qdrant, PostgreSQL, SQL, Firebase
Cloud / DevOps :	AWS (EC2, S3), Docker, Git, GitHub
Tools :	TensorFlow, scikit-learn, Pandas, NumPy, Jupyter, LiveKit
Web / APIs :	FastAPI, REST APIs, JavaScript, HTML, CSS
Engineering Fundamentals :	Data Structures & Algorithms

Education

SRM University, Amaravati <i>B.Tech in Computer Science and Engineering</i> <i>CGPA : 9.08</i>	2024
Delhi Public School, Berhampur <i>Higher Secondary (CBSE)</i> <i>Grade : 74</i>	2022

Volunteering

Next Tech Lab Associate	Mar 2025 – Present
• Engaged in peer-to-peer learning, built ML/AI projects and received mentorship from senior members. • Focus areas: Deep Learning, Retrieval-Augmented Generation (RAG), Artificial Intelligence .	
MSC Hack, Amaravati Front-End Designer	Jan 2025
• Participated in an inter-college hackathon, contributed front-end components and secured 4th place.	

Achievements

Smart India Hackathon (SIH) Agent Builder	Oct 2025
• Qualified among 500+ teams for an AR-based cultural heritage preservation solution featuring 3D reconstructions and immersive historical visualization. • Developed an AI-driven query-response system using a domain-specific RAG pipeline that answers user questions strictly related to cultural heritage content, ensuring accurate, contextual, and bounded information retrieval within the AR environment.	

- Contributing to a Dockerized Voice AI platform (Python& FastAPI) with LightRAG-based RAG, LiveKit real-time audio, Testing agents, production-ready integrations on AWS .
